Group Manager (Role)	✕	✕	✕	✕

Each Group code should have a Group Manager responsible for requesting additional Users to their group, as well as requesting additional platform assignments.

- ◦ Master User privileges are typically requested by Group Manager.
- ◦ We need to work on identifying Group Managers for each group code.

Platform Description Table (PDT) Updates

It is a requirement that Users update the DCP Manufacturer info, Country, location, shef codes, and primary point of contact as soon as possible after receiving allocations.

National Weather Service uses the majority of the data going through the GOES DCS, and depends on the accuracy of the PDT to assist in saving lives and property.

PDT Updates

Two basic ways to update the PDT:

- Manual updates by modifying each individual PDT.
- Creating a batch file that can update multiple PDT records simultaneously.

Manual PDT Updates

- To update PDTs, you must have <u>Master User privileges</u> on your DADDS account.
- Click on the 'Platforms' tab.
- Create a filter for either individual DCP IDs or Group Codes.
- Once results are returned, click on the address to enter the PDT.
- The 'General' tab cannot be changed by the User.

Batch File PDT Updates

- Batch file updates are a convenient way to update multiple PDTs simultaneously.
- Must create a script in a text file.
- Can create batch files to update only one PDT or hundreds, depending on how many fields are being updated.

Creating Batch Files for PDT Updates

UPDATE PDT FFE086B0   (PDT ID/NESID must be 8 characters)
