## About User Accounts

- *Users are uniquely identified by e-mail address. Each account must have a unique email address and each individual user must have an individual user account.*
- *At least one user for each agency must be identified as the “Master User”. Only users with that status may modify PDT records.*
- *E-mail is used as a verification and communication method to the user.*
- *Logins and passwords are validated against password rules. Passwords follow NOAA rules for complexity, periodic expiration, and limited reuse.*

## About User Accounts cont'd

- *A user can only be logged into the system once. If a user does not log out properly, or simply closes his browser and then tries to login again, he will be presented with a warning message.*
- *When logging in, a user is notified that another user is currently logged in with that username. If desired, the active session of the first user is logged out.*
- *An inactive user is automatically logged off after a warning period. A message is shown after 10 minutes of inactivity. If this message is not acknowledged in 1 minute, the user will be automatically logged off.*

1 - 20 OF 733 SUAS

- 
- *It is important to have a Detailed Program Description, which includes the mission of the organization and how DCS will assist.*
  - *Also make sure ALL contact information is updated for persons listed on the SUA.*
  - *Once a completed SUA has been submitted it goes through a four (4) step approval process.*
  - *After an SUA is approved all the contacts listed on the SUA will get an approval notice that the SUA has been renewed along with a copy of the updated SUA.*

# ***Who Should Register for a DADDS Account?***

- *We encourage all involved with GOES DCS to complete a DADDS registration and become familiar with the system. There is no limit to the number of registrations for an Organization.*
- *We also use the DADDS registrations as our mailing list for system notices.*
