HEC Workshop

- Workshop went off at HEC with... a reasonable number of hitches
- Mailing list was created at [freelists.org](https://www.freelists.org) : <https://www.freelists.org/list/opendcs>
 - Several people (including vendors) have signed up.
 - It is for all questions and concerns
- An initial set of things to identify responsible parties for was made.
- A rest_api and web interface web presented which excited everyone.
- Keep an eye on <https://github.com/opendcs/> for releases of opendcs and other components
 - (such as DCPMonitor)
- Two USACE staff have volunteered to modernize and maintain DCPMonitor.
- Overview of the workshop and presentations are available here:
<https://github.com/opendcs/opendcs/wiki/Workshops-HEC2022>
